

Amazon dream

Looking above my dream Amazon rainforest, it would look like swishing ferns on the ground and swishing trees waving in the wind. I can hear tweeting birds in the leafless branches. When you fall you start to feel softness in your body, there is a river that smoothly runs down the river. When you look up into the sky you see a barrier of rainbows that covers the beautiful sky while a nice emerald, wet leaves fall on your head. The wind makes you feel like you're floating! All trees bark look like

chocolate that makes your mouth water.

The Law

I will not allow people ruining the forest so if anyone breaks this law such as chopping down bushes and trees and picking flowers, they will be sent to prison for 2 and a half years.

✓ lovely well-written description and I like your Dream Amazon Law too!

I I was to look at my rainforest from above tree
level I would see smooth, waxy leaves along the trees that
stretch for miles. As I walk through the olive green ferns
I see many animals flying and jumping around. Then
I see the fabulous River Niger flowing cleanly and I can
hear singing birds tweeting, chirping and squawking happily
throughout the forest. It is so nice to be able
to see the clean River Niger and to see lots of
dart frogs jumping around like cute monkeys*.

Well described,

Amazon Dream

Gleaming water shines on the jade leaves and beautiful sunlight streams
through the leafy canopy. I love feeling the softest ferns covering
the floor like a carpet and hearing little birds tweeting from their
magnificent nests. There is a lovely clean, shimmering river and lots of
kind people. No illegal logging and lots of animals. My dream
Amazon is where you want to be.

I agree, I'd like to be there

Amazon Dream

When I look down at the Amazon Rainforest I see emerald leaves, buttress roots and rubber trees are nearly touching me and I can see them for miles ahead. When I fly down for some food I see the light shimmering through the gaps of the trees. The floor is covered with soft, furry ferns and the smell of the soil. The buttress roots clinging onto the soil like it doesn't want to go away from people cutting down the tree. I love the sound of all of the animals having fun with their friends and family.

This is a good description using the correct language of rainforests and looks in from above

amazon dream

chestnut

I heard the trees were swaying side to side and people rustling leaves. The rushing river for miles and miles. The trees clinging to the soil trying to survive. I heard the trees being chopped down. I heard it for days. I wish I never heard it. In the canopy one tree taller than any other tree. It's the great Kabok tree that is home to many animals in the rainforest. There is lots of animals like jaguars birds and dogs.

Neat, well-thought out and I like your Amazon Dream.
